Helping People Help the Rivers

Improve farm sustainability and help aquatic wildlife

Take control of erosion and help enhance aquatic habitat! The **Working Lands for Wildlife** program through NRCS creates a **win-win for producers and aquatic wildlife** by boosting farm sustainability and productivity while enriching precious water resources that are important for irrigation, wildlife, and recreation.

Technical and Financial Assistance Available

- Cover Crops
- Watering Facilities
- Fencing
- Streambank Stabilization
- Aquatic Habitat Enhancement
- Stream Crossings, etc...

Eastern Hellbenders depend on clean water. This program is focused on enhancing habitat for this ancient and iconic species of the Appalachian Mountains. Plus, enhancing habitat for Hellbenders also improves habitat for trout and other sport fish!
